Gait & Posture

journal homepage: www.elsevier.com/locate/gaitpost

Volume 30 (2009)

Subject index

Accelerometer; Activity monitor; Classification tree; Delirium; Subtype **30**, 245

Accelerometer; Gait event; Heel strike; Footswitch; Biofeedback **30**, 523

Accelerometer; Gait rehabilitation; Gait asymmetry; Orthopaedic shoes; Orthoses **30**, 492

Accelerometer; Gait; Repeatability; Reference data **30**, 192

Accelerometry; Ankle joint; Joint instability; Ankle inversion; Validation studies **30**, 82

Accelerometry; Cumulative loading; Adduction moment; Impulse; Physical activity **30**, 497

Accelerometry; Gait; Reproducibility; Aging **30**, 351

Accidental falls; Ageing; Obstacle crossing; Gait **30**, 270

Accidental; Prostheses and implants; Postural balance; Falls; Biofeedback **30**, 16

Activity monitor; Classification tree; Delirium; Subtype; Accelerometer **30**, 245

Adaptation; Balance; Muscle fatigue; Hip; Unilateral sensorimotor alteration; Centre of foot pressure **30**, 122

Adaptation; EMG activity; Postural control; Proprioception; Vibration **30**, 93

Adduction moment; Cumulative loading; Impulse; Accelerometry; Physical activity **30**, 497

Adolescents; Cerebral palsy; Orthopedic treatment; Gait analysis; Adults **30**, 201

Adults; Cerebral palsy; Orthopedic treatment; Gait analysis; Adolescents **30**, 201

Afferent input; Gait; Locomotor; Human movement system **30**, 436

Age; Balance; Postural control; Ankle fatigue; Model-based simulation **30**, 518

Aged; Balance; Footwear; Gait termination; Surfaces; Gait **30**, 65

Aged; Gait; Vision; Balance; Dark adaptation **30**, 233

Ageing; Obstacle crossing; Accidental falls; Gait **30**, 270

Aging; Falls; Gait; Stability; Upper body **30**, 260

Aging; Gait; Alzheimer's disease **30**, 452

Aging; Gait; Lower extremity; Lateral balance; Center of mass **30**, 217

Aging; Gait; Reproducibility; Accelerometry **30**, 351

Aging; Recurrence quantification analysis; Center of pressure; Quiet standing; Visual feedback **30**, 223

Aging; Slips and falls; Joint moment; Inverse dynamics; Locomotion; Falls **30**, 276

Altered movement pattern; Sit-to-stand; Total knee arthroplasty **30**, 187

Alzheimer's disease; Gait; Aging **30**, 452

Ambulation; Biomechanics; Lower extremity **30**, 543

Amputee; Gait; Energy cost; Metabolic energy; Mechanical work **30**, 35

Ankle; Ankle foot orthoses (AFO); Gait; Stiffness; Orthotics **30**, 144

Ankle; Biofeedback; Force sense; Proprioception; Muscle fatigue; Tongue display unit **30**, 556

Ankle; Bio-robotics; Gait transition; Locomotion; Powered exoskeleton; Plantar flexors **30**, 322

Ankle fatigue; Balance; Postural control; Age; Model-based simulation **30**, 518

Ankle foot orthoses (AFO); Gait; Stiffness; Orthotics; Ankle **30**, 144

Ankle inversion; Ankle joint; Joint instability; Validation studies; Accelerometry **30**, 82

Ankle joint; Joint instability; Ankle inversion; Validation studies; Accelerometry **30**, 82

Ankle motion; Total ankle replacement; Human movement analysis; Total 3D gait protocol **30**, 132

ANN analysis; Stroke; Hemiplegia; Gait patterns **30**, 207

Anterior cruciate ligament; Posture; Cognition; Dual-task; Attention **30**, 477

APA (anticipatory postural adjustment); Isometric ramp push; Seat and foot reaction forces; Postural dynamics; Posturo-kinetic capacity (PKC) **30**, 282

Arm model; Upper extremity model; Shoulder joint; Elbow joint; Motion analysis; Universal goniometer measurements; Functional method **30**, 469

Attention; Anterior cruciate ligament; Posture; Cognition; Dual-task **30**, 477

Attention; Gait; Limping; Human locomotion **30**, 340

Attention; Postural control; Automaticity; Regularity; Dance **30**, 106

Attentional influence on gait; Dual-task costs; Electromyography; Phases of gait; Motor control of gait **30**, 227

Auditory system; Postural control; Visual system; Feedback; Posturography **30**, 328

Automaticity; Postural control; Attention; Regularity; Dance **30**, 106

Axial segment coordination; Turning; Gaze; Steering; Locomotion; Virtual environment; Oculomotor **30**, 317

Backpack; Stability; Military; Female; Injury; Sway; Posture **30**, 115

Balance; Adaptation; Muscle fatigue; Hip; Unilateral sensorimotor alteration; Centre of foot pressure **30**, 122

Balance; Aged; Gait; Vision; Dark adaptation **30**, 233

Balance; Biofeedback; Dual task; Gait; Elderly **30**, 76

Balance; Footwear; Gait termination; Aged; Surfaces; Gait **30**, 65

Balance; Gait; Physical guidance; Motor learning; Beam walking **30**, 464

Balance; Metabolic energy; Energetics; Postural control; Posturography **30**, 150

Balance; Parkinson's disease; Step response; Postural instability **30**, 538

Balance; Postural control; Age; Ankle fatigue; Model-based simulation **30**, 518

Beam walking; Gait; Balance; Physical guidance; Motor learning **30**, 464

Bed rest; Hip joint; Muscle atrophy; Iliopsoas; Magnetic resonance imaging **30**, 533

Bilateral upper limb task; Postural adjustments; Symmetry; Electromyography; Human **30**, 239

Biofeedback; Balance; Dual task; Gait; Elderly **30**, 76

Biofeedback; Force sense; Proprioception; Muscle fatigue; Ankle; Tongue display unit **30**, 556

Biofeedback; Gait event; Heel strike; Accelerometer; Footswitch **30**, 523

Biofeedback; Prostheses and implants; Postural balance; Falls; Accidental **30**, 16

Biomechanics; Ambulation; Lower extremity **30**, 543

Biomechanics; Diabetes mellitus; Vacuum orthoses; Foot loading; Plantar pressure **30**, 11

Biomechanics; Femoroacetabular impingement; Gait; Hip; Pelvis **30**, 41

Biomechanics; Foot; Hallux valgus; Plantar stresses; Plantar shear; Instrumentation **30**, 257

Biomechanics; Gait analysis; Repeatability; Gillette Gait Index; Children **30**, 22

Biomechanics; Gait; Total hip replacement; Hip joint; Musculoskeletal modelling; Hip loading **30**, 296

Biomechanics; Motion analysis; Myelomeningocele; Upper extremity; Lofstrand crutches; Dynamics **30**, 511

Biomechanics; Running; Human locomotion; Center of mass; Motion analysis **30**, 552

Biomedical engineering; Muscle spasticity; Cerebral palsy; Rehabilitation; Movement analysis **30**, 138

Bio-robotics; Gait transition; Locomotion; Powered exoskeleton; Plantar flexors; Ankle **30**, 322

Body weight support; Treadmill training; Lower Body Positive Pressure; Harness; Froude number **30**, 446

Botulinum toxin; Stroke; Gait **30**, 168

CAST; Foot structure; In vivo; Pronation; Walking **30**, 334

Center of mass; Gait; Aging; Lower extremity; Lateral balance **30**, 217

Center of mass; Gait; Stability; Disability; Down syndrome **30**, 345

Center of mass; Gait; Utilized coefficient of friction; Footwear; Sole hardness **30**, 303

Center of mass; Running; Human locomotion; Motion analysis; Biomechanics **30**, 552

Center of pressure; Recurrence quantification analysis; Quiet standing; Aging; Visual feedback **30**, 223

Centre of foot pressure; Adaptation; Balance; Muscle fatigue; Hip; Unilateral sensorimotor alteration **30**, 122

Cerebral palsy; Crouch gait; k-means Cluster analysis; Singular value decomposition; Principal component analysis **30**, 155

Cerebral palsy; Gait; Kinetics; Upper extremity; Walker **30**, 364

Cerebral palsy; Hemiplegia; Upper limb; Movement analysis **30**, 395

Cerebral palsy; Muscle spasticity; Rehabilitation; Movement analysis; Biomedical engineering **30**, 138

Cerebral palsy; Orthopedic treatment; Gait analysis; Adolescents; Adults **30**, 201

Cerebral palsy; Predicting outcomes; Rectus femoris transfer; Stiff knee gait; Gait analysis **30**, 100

Cerebral palsy; Single event multilevel surgery; Hamstring length; Distal hamstring lengthening; Rectus femoris transfer; Pelvic tilt; Kinematics **30**, 487

Children; Gait analysis; Biomechanics; Repeatability; Gillette Gait Index **30**, 22

Children; Gait; Vision; Kinematics; Postural control **30**, 55, 307

Classification tree; Activity monitor; Delirium; Subtype; Accelerometer **30**, 245

Clinical assessment; Huntington's disease; Pre-symptomatic; Mobility and balance **30**, 391

Cognition; Anterior cruciate ligament; Posture; Dual-task; Attention **30**, 477

Cognition; Movement reinvestment; Postural threat; Postural control **30**, 528

Comfort; Foot morphology; Four-dimensional measurement; Walking; Plantar arch height; Medial arch length **30**, 482

CoP; Hemiparesis; Gait; Stabilometry; Posture **30**, 5

Crouch gait; Cerebral palsy; k-means Cluster analysis; Singular value decomposition; Principal component analysis **30**, 155

Cumulative loading; Adduction moment; Impulse; Accelerometry; Physical activity **30**, 497

Dance; Postural control; Automaticity; Attention; Regularity **30**, 106

Dark adaptation; Aged; Gait; Vision; Balance **30**, 233

Deceptive instructions; Stride kinematics; Stride dynamics; Expectations; Psychology **30**, 507

Degrees-of-freedom; Gait; Kinematic; Protocol; Repeatability **30**, 173

Delirium; Activity monitor; Classification tree; Subtype; Accelerometer **30**, 245

Detrended fluctuation analysis; Treadmill; Handrail; Overground; Gait; Stride interval; Stride dynamics **30**, 431

Diabetes mellitus; Vacuum orthoses; Foot loading; Plantar pressure; Biomechanics **30**, 11

Diabetic peripheral neuropathy; Posture control; Stability; Rocker bottom soles **30**, 45

Direct measurements; Inverse dynamics; Ground reaction vector technique; Transfemoral amputation; Prosthetic gait **30**, 560

Disability; Gait; Center of mass; Stability; Down syndrome **30**, 345

Discriminant function analysis; Knee osteoarthritis; Total knee replacement; Gait analysis; Stair climbing; Principle component analysis **30**, 197

Distal hamstring lengthening; Cerebral palsy; Single event multilevel surgery; Hamstring length; Rectus femoris transfer; Pelvic tilt; Kinematics **30**, 487

Down syndrome; Gait; Center of mass; Stability; Disability **30**, 345

Dual task; Balance; Biofeedback; Gait; Elderly **30**, 76

Dual task; Myelomeningocele; Postural sway; Sitting **30**, 424

Dual-task; Anterior cruciate ligament; Posture; Cognition; Attention **30**, 477

Dual-task costs; Attentional influence on gait; Electromyography; Phases of gait; Motor control of gait **30**, 227

Dynamics; Motion analysis; Myelomeningocele; Upper extremity; Lofstrand crutches; Biomechanics **30**, 511

Elbow joint; Upper extremity model; Arm model; Shoulder joint; Motion analysis; Universal goniometer measurements; Functional method **30**, 469

Elderly; Balance; Biofeedback; Dual task; Gait **30**, 76

Electromyography; Attentional influence on gait; Dual-task costs; Phases of gait; Motor control of gait **30**, 227

Electromyography; Low-intensity perturbation; Posture; Kinematics **30**, 417

Electromyography; Postural adjustments; Symmetry; Bilateral upper limb task; Human **30**, 239

Electromyography; Trunk; Posture; Perturbation; Muscle **30**, 181

EMG activity; Postural control; Adaptation; Proprioception; Vibration **30**, 93

EMG; Ground reaction forces; Gait initiation; Stepping; Sensory perturbation **30**, 1

Energetics; Metabolic energy; Balance; Postural control; Posturography **30**, 150

Energy cost; Gait; Amputee; Metabolic energy; Mechanical work **30**, 35

Expectations; Stride kinematics; Stride dynamics; Deceptive instructions; Psychology **30**, 507

Falls; Aging; Gait; Stability; Upper body **30**, 260

Falls; Prostheses and implants; Postural balance; Accidental; Biofeedback **30**, 16

Falls; Slips and falls; Joint moment; Inverse dynamics; Locomotion; Aging **30**, 276

Falls; Stochastic resonance; Gait; Noise; Variability **30**, 383

Feedback; Postural control; Visual system; Auditory system; Posturography **30**, 328

Female; Stability; Backpack; Military; Injury; Sway; Posture **30**, 115

Femoroacetabular impingement; Gait; Biomechanics; Hip; Pelvis **30**, 41

Foot and ankle modeling; Gait simulation; Motion analysis; Skin artifact **30**, 27

Foot; Biomechanics; Hallux valgus; Plantar stresses; Plantar shear; Instrumentation **30**, 257

Foot; Kinematics; Repeatability; Instrumented gait analysis; Oxford foot model **30**, 118

Foot loading; Diabetes mellitus; Vacuum orthoses; Plantar pressure; Biomechanics **30**, 11

Foot morphology; Four-dimensional measurement; Walking; Plantar arch height; Medial arch length; Comfort **30**, 482

Foot structure; CAST; In vivo; Pronation; Walking **30**, 334

Footswitch; Gait event; Heel strike; Accelerometer; Biofeedback **30**, 523

Footwear; Balance; Gait termination; Aged; Surfaces; Gait **30**, 65

Footwear; Gait; Symmetry; Gait maturation **30**, 502

Footwear; Gait; Utilized coefficient of friction; Center of mass; Sole hardness **30**, 303

Force sense; Biofeedback; Proprioception; Muscle fatigue; Ankle; Tongue display unit **30**, 556

Four-dimensional measurement; Foot morphology; Walking; Plantar arch height; Medial arch length; Comfort **30**, 482

Freezing; Gait; Parkinson's disease; Validity; Reliability **30**, 459

Froude number; Treadmill training; Body weight support; Lower Body Positive Pressure; Harness **30**, 446

Functional data analysis; Simultaneous estimation; Kinematic gait data; Reference population **30**, 441

Functional gait; Neuropathy; Locomotion; Mobility; Lyapunov; Variability; Posture **30**, 253

Functional method; Upper extremity model; Arm model; Shoulder joint; Elbow joint; Motion analysis; Universal goniometer measurements **30**, 469

Gait; Accelerometer; Repeatability; Reference data **30**, 192

Gait; Aged; Vision; Balance; Dark adaptation **30**, 233

Gait; Ageing; Obstacle crossing; Accidental falls **30**, 270

Gait; Aging; Lower extremity; Lateral balance; Center of mass **30**, 217

Gait; Alzheimer's disease; Aging **30**, 452

Gait; Amputee; Energy cost; Metabolic energy; Mechanical work **30**, 35

Gait analysis; Biomechanics; Repeatability; Gillette Gait Index; Children **30**, 22

Gait analysis; Cerebral palsy; Orthopedic treatment; Adolescents; Adults **30**, 201

Gait analysis; Knee osteoarthritis; Total knee replacement; Stair climbing; Principle component analysis; Discriminant function analysis **30**, 197

Gait analysis; Predicting outcomes; Rectus femoris transfer; Stiff knee gait; Cerebral palsy **30**, 100

Gait analysis; Thigh wand; Patella marker; Newington marker set **30**, 375

Gait analysis; Transtibial amputee; Prosthesis; Stair; Microprocessor ankle **30**, 356

Gait analysis; Tri-axial accelerometer; Walking dynamics; Stroke patient **30**, 60

Gait analysis; Variability; Reliability; Total knee replacement; Motion analysis **30**, 288

Gait; Ankle foot orthoses (AFO); Stiffness; Orthotics; Ankle **30**, 144

Gait asymmetry; Gait rehabilitation; Orthopaedic shoes; Orthoses; Accelerometer **30**, 492

Gait; Attention; Limping; Human locomotion **30**, 340

Gait; Balance; Biofeedback; Dual task; Elderly **30**, 76

Gait; Balance; Footwear; Gait termination; Aged; Surfaces **30**, 65

Gait; Balance; Physical guidance; Motor learning; Beam walking **30**, 464

Gait; Center of mass; Stability; Disability; Down syndrome **30**, 345

Gait; Cerebral palsy; Kinetics; Upper extremity; Walker **30**, 364

Gait; Children; Vision; Kinematics; Postural control **30**, 55, 307

Gait Deviation Index; Gait pathology; Outcome; Gait Profile Score; Movement Analysis Profile **30**, 265

Gait event; Heel strike; Accelerometer; Footswitch; Biofeedback **30**, 523

Gait; Falls; Aging; Stability; Upper body **30**, 260

Gait; Femoroacetabular impingement; Biomechanics; Hip; Pelvis **30**, 41

Gait; Footwear; Symmetry; Gait maturation **30**, 502

Gait; Hemiparesis; Stabilometry; Posture; CoP **30**, 5

Gait initiation; EMG; Ground reaction forces; Stepping; Sensory perturbation **30**, 1

Gait; Kinematic; Protocol; Degrees-of-freedom; Repeatability **30**, 173

Gait; Kinematics; Patellofemoral pain syndrome; Risk factors; Locomotion; Walking; Running **30**, 405

Gait; Locomotor; Afferent input; Human movement system **30**, 436

Gait maturation; Gait; Footwear; Symmetry **30**, 502

Gait; Obstacle crossing; Stroke; Intrasession reliability **30**, 455

Gait; Parkinson's disease; Freezing; Validity; Reliability **30**, 459

Gait pathology; Outcome; Gait Profile Score; Gait Deviation Index; Movement Analysis Profile **30**, 265

Gait patterns; Stroke; Hemiplegia; ANN analysis **30**, 207

Gait Profile Score; Gait pathology; Outcome; Gait Deviation Index; Movement Analysis Profile **30**, 265

Gait rehabilitation; Gait asymmetry; Orthopaedic shoes; Orthoses; Accelerometer **30**, 492

Gait; Reproducibility; Aging; Accelerometry **30**, 351

Gait simulation; Foot and ankle modeling; Motion analysis; Skin artifact **30**, 27

Gait; Spina bifida; Low back **30**, 388

Gait; Stochastic resonance; Noise; Variability; Falls **30**, 383

Gait; Stroke; Botulinum toxin **30**, 168

Gait; Stroke; Ground reaction force; Reliability; Summarizing indices **30**, 127

Gait termination; Balance; Footwear; Aged; Surfaces; Gait **30**, 65

Gait; Total hip replacement; Biomechanics; Hip joint; Musculoskeletal modelling; Hip loading **30**, 296

Gait transition; Bio-robotics; Locomotion; Powered exoskeleton; Plantar flexors; Ankle **30**, 322

Gait; Treadmill; Handrail; Overground; Detrended fluctuation analysis; Stride interval; Stride dynamics **30**, 431

Gait; Utilized coefficient of friction; Center of mass; Footwear; Sole hardness **30**, 303

Gaze; Turning; Axial segment coordination; Steering; Locomotion; Virtual environment; Oculomotor **30**, 317

Gender; Posture; Rowing; Plantar-flexion; Sway **30**, 50

Gillette Gait Index; Gait analysis; Biomechanics; Repeatability; Children **30**, 22

Ground reaction force; Stroke; Gait; Reliability; Summarizing indices **30**, 127

Ground reaction forces; EMG; Gait initiation; Stepping; Sensory perturbation **30**, 1

Ground reaction vector technique; Inverse dynamics; Direct measurements; Transfemoral amputation; Prosthetic gait **30**, 560

Hallux valgus; Biomechanics; Foot; Plantar stresses; Plantar shear; Instrumentation **30**, 257

Hamstring length; Cerebral palsy; Single event multilevel surgery; Distal hamstring lengthening; Rectus femoris transfer; Pelvic tilt; Kinematics **30**, 487

Hamstrings cocontraction; Knee simulator; Rectus femoris transfer **30**, 87

Handrail; Treadmill; Overground; Detrended fluctuation analysis; Gait; Stride interval; Stride dynamics **30**, 431

Harness; Treadmill training; Body weight support; Lower Body Positive Pressure; Froude number **30**, 446

Heel strike; Gait event; Accelerometer; Footswitch; Biofeedback **30**, 523

Hemiparesis; Gait; Stabilometry; Posture; CoP **30**, 5

Hemiplegia; Cerebral palsy; Upper limb; Movement analysis **30**, 395

Hemiplegia; Stroke; ANN analysis; Gait patterns **30**, 207

Hip; Adaptation; Balance; Muscle fatigue; Unilateral sensorimotor alteration; Centre of foot pressure **30**, 122

Hip; Femoroacetabular impingement; Gait; Biomechanics; Pelvis **30**, 41

Hip joint; Bed rest; Muscle atrophy; Iliopsoas; Magnetic resonance imaging **30**, 533

Hip joint; Gait; Total hip replacement; Biomechanics; Musculoskeletal modelling; Hip loading **30**, 296

Hip loading; Gait; Total hip replacement; Biomechanics; Hip joint; Musculoskeletal modelling **30**, 296

Human locomotion; Gait; Attention; Limping **30**, 340

Human locomotion; Running; Center of mass; Motion analysis; Biomechanics **30**, 552

Human movement analysis; Total ankle replacement; Total 3D gait protocol; Ankle motion **30**, 132

Human movement system; Gait; Locomotor; Afferent input **30**, 436

Human; Postural adjustments; Symmetry; Bilateral upper limb task; Electromyography **30**, 239

Humans; Posture; Musculoskeletal equilibrium; Models/biological **30**, 161

Huntington's disease; Pre-symptomatic; Clinical assessment; Mobility and balance **30**, 391

Iliopsoas; Bed rest; Hip joint; Muscle atrophy; Magnetic resonance imaging **30**, 533

Impulse; Cumulative loading; Adduction moment; Accelerometry; Physical activity **30**, 497

In vivo; CAST; Foot structure; Pronation; Walking **30**, 334

Injury; Stability; Backpack; Military; Female; Sway; Posture **30**, 115

Instrumentation; Biomechanics; Foot; Hallux valgus; Plantar stresses; Plantar shear **30**, 257

Instrumented gait analysis; Foot; Kinematics; Repeatability; Oxford foot model **30**, 118

Inter-observer; Plantar pressure; Standardization; Reliability; Masking; Intra-observer **30**, 379

Intra-observer; Plantar pressure; Standardization; Reliability; Masking; Inter-observer **30**, 379

Intrasession reliability; Obstacle crossing; Stroke; Gait **30**, 455

Inverse dynamics; Ground reaction vector technique; Direct measurements; Transfemoral amputation; Prosthetic gait **30**, 560

Inverse dynamics; Muscle weakness; Movement analysis **30**, 110

Inverse dynamics; Slips and falls; Joint moment; Locomotion; Aging; Falls **30**, 276

Isometric ramp push; Seat and foot reaction forces; APA (anticipatory postural adjustment); Postural dynamics; Posturo-kinetic capacity (PKC) **30**, 282

Joint instability; Ankle joint; Ankle inversion; Validation studies; Accelerometry **30**, 82

Joint moment; Slips and falls; Inverse dynamics; Locomotion; Aging; Falls **30**, 276

Kinematic gait data; Functional data analysis; Simultaneous estimation; Reference population **30**, 441

Kinematic; Gait; Protocol; Degrees-of-freedom; Repeatability **30**, 173

Kinematics; Cerebral palsy; Single event multilevel surgery; Hamstring length; Distal hamstring lengthening; Rectus femoris transfer; Pelvic tilt **30**, 487

Kinematics; Foot; Repeatability; Instrumented gait analysis; Oxford foot model **30**, 118

Kinematics; Gait; Children; Vision; Postural control **30**, 55, 307

Kinematics; Gait; Patellofemoral pain syndrome; Risk factors; Locomotion; Walking; Running **30**, 405

Kinematics; Low-intensity perturbation; Posture; Electromyography **30**, 417

Kinematics; Osteosarcoma; Pathological gait; Kinetics **30**, 547

Kinematics; Rehabilitation; Pelvis; Motor control **30**, 312

Kinetics; Cerebral palsy; Gait; Upper extremity; Walker **30**, 364

Kinetics; Osteosarcoma; Pathological gait; Kinematics **30**, 547

k-means Cluster analysis; Crouch gait; Cerebral palsy; Singular value decomposition; Principal component analysis **30**, 155

Knee osteoarthritis; Total knee replacement; Gait analysis; Stair climbing; Principle component analysis; Discriminant function analysis **30**, 197

Knee simulator; Hamstrings cocontraction; Rectus femoris transfer **30**, 87

Lateral balance; Gait; Aging; Lower extremity; Center of mass **30**, 217

Limping; Gait; Attention; Human locomotion **30**, 340

Locomotion; Bio-robotics; Gait transition; Powered exoskeleton; Plantar flexors; Ankle **30**, 322

Locomotion; Gait; Kinematics; Patellofemoral pain syndrome; Risk factors; Walking; Running **30**, 405

Locomotion; Neuropathy; Functional gait; Mobility; Lyapunov; Variability; Posture **30**, 253

Locomotion; Slips and falls; Joint moment; Inverse dynamics; Aging; Falls **30**, 276

Locomotion; Turning; Gaze; Axial segment coordination; Steering; Virtual environment; Oculomotor **30**, 317

Locomotor; Gait; Afferent input; Human movement system **30**, 436

Lofstrand crutches; Motion analysis; Myelomeningocele; Upper extremity; Dynamics; Biomechanics **30**, 511

Low back; Spina bifida; Gait **30**, 388

Lower Body Positive Pressure; Treadmill training; Body weight support; Harness; Froude number **30**, 446

Lower extremity; Ambulation; Biomechanics **30**, 543

Lower extremity; Gait; Aging; Lateral balance; Center of mass **30**, 217

Low-intensity perturbation; Posture; Kinematics; Electromyography **30**, 417

Lyapunov; Neuropathy; Functional gait; Locomotion; Mobility; Variability; Posture **30**, 253

Magnetic resonance imaging; Bed rest; Hip joint; Muscle atrophy; Iliopsoas **30**, 533

Masking; Plantar pressure; Standardization; Reliability; Inter-observer; Intra-observer **30**, 379

Mechanical work; Gait; Amputee; Energy cost; Metabolic energy **30**, 35

Medial arch length; Foot morphology; Four-dimensional measurement; Walking; Plantar arch height; Comfort **30**, 482

Metabolic energy; Energetics; Balance; Postural control; Posturography **30**, 150

Metabolic energy; Gait; Amputee; Energy cost; Mechanical work **30**, 35

Microprocessor ankle; Transtibial amputee; Gait analysis; Prosthesis; Stair **30**, 356

Military; Stability; Backpack; Female; Injury; Sway; Posture **30**, 115

Minimum-foot-clearance; Peripheral visual cues; Visual exproprioception; Overground locomotion; Online control **30**, 370

Mobility and balance; Huntington's disease; Pre-symptomatic; Clinical assessment **30**, 391

Mobility; Neuropathy; Functional gait; Locomotion; Lyapunov; Variability; Posture **30**, 253

Model-based simulation; Balance; Postural control; Age; Ankle fatigue **30**, 518

Models/biological; Posture; Musculoskeletal equilibrium; Humans **30**, 161

Motion analysis; Foot and ankle modeling; Gait simulation; Skin artifact **30**, 27

Motion analysis; Myelomeningocele; Upper extremity; Lofstrand crutches; Dynamics; Biomechanics **30**, 511

Motion analysis; Running; Human locomotion; Center of mass; Biomechanics **30**, 552

Motion analysis; Upper extremity model; Arm model; Shoulder joint; Elbow joint; Universal goniometer measurements; Functional method **30**, 469

Motion analysis; Variability; Reliability; Total knee replacement; Gait analysis **30**, 288

Motor control of gait; Attentional influence on gait; Dual-task costs; Electromyography; Phases of gait **30**, 227

Motor control; Rehabilitation; Kinematics; Pelvis **30**, 312

Motor learning; Gait; Balance; Physical guidance; Beam walking **30**, 464

Movement analysis; Hemiplegia; Cerebral palsy; Upper limb **30**, 395

Movement analysis; Muscle spasticity; Cerebral palsy; Rehabilitation; Biomedical engineering **30**, 138

Movement analysis; Muscle weakness; Inverse dynamics **30**, 110

Movement Analysis Profile; Gait pathology; Outcome; Gait Profile Score; Gait Deviation Index **30**, 265

Movement reinvestment; Cognition; Postural threat; Postural control **30**, 528

Muscle atrophy; Bed rest; Hip joint; Iliopsoas; Magnetic resonance imaging **30**, 533

Muscle fatigue; Adaptation; Balance; Hip; Unilateral sensorimotor alteration; Centre of foot pressure **30**, 122

Muscle fatigue; Biofeedback; Force sense; Proprioception; Ankle; Tongue display unit **30**, 556

Muscle spasticity; Cerebral palsy; Rehabilitation; Movement analysis; Biomedical engineering **30**, 138

Muscle; Trunk; Posture; Electromyography; Perturbation **30**, 181

Muscle weakness; Inverse dynamics; Movement analysis **30**, 110

Musculoskeletal equilibrium; Posture; Humans; Models/biological **30**, 161

Musculoskeletal modelling; Gait; Total hip replacement; Biomechanics; Hip joint; Hip loading **30**, 296

Myelomeningocele; Motion analysis; Upper extremity; Lofstrand crutches; Dynamics; Biomechanics **30**, 511

Myelomeningocele; Postural sway; Sitting; Dual task **30**, 424

Neuropathy; Functional gait; Locomotion; Mobility; Lyapunov; Variability; Posture **30**, 253

Newington marker set; Gait analysis; Thigh wand; Patella marker **30**, 375

Noise; Stochastic resonance; Gait; Variability; Falls **30**, 383

Obstacle crossing; Ageing; Accidental falls; Gait **30**, 270

Obstacle crossing; Stroke; Gait; Intrasession reliability **30**, 455

Oculomotor; Turning; Gaze; Axial segment coordination; Steering; Locomotion; Virtual environment **30**, 317

Online control; Minimum-foot-clearance; Peripheral visual cues; Visual exproprioception; Overground locomotion **30**, 370

Orthopaedic shoes; Gait rehabilitation; Gait asymmetry; Orthoses; Accelerometer **30**, 492

Orthopedic treatment; Cerebral palsy; Gait analysis; Adolescents; Adults **30**, 201

Orthoses; Gait rehabilitation; Gait asymmetry; Orthopaedic shoes; Accelerometer **30**, 492

Orthotics; Ankle foot orthoses (AFO); Gait; Stiffness; Ankle **30**, 144

Osteosarcoma; Pathological gait; Kinematics; Kinetics **30**, 547

Outcome; Gait pathology; Gait Profile Score; Gait Deviation Index; Movement Analysis Profile **30**, 265

Overground locomotion; Minimum-foot-clearance; Peripheral visual cues; Visual exproprioception; Online control **30**, 370

Overground; Treadmill; Handrail; Detrended fluctuation analysis; Gait; Stride interval; Stride dynamics **30**, 431
